MODELS	Description
--------	-------------

<p>PowrTouch Evolution Modern Lightweight Mover Weighing only 30kg</p>	<p>This model will fit all European manufactured single axle caravans, and with the new lightweight and compact design, this caravan mover will also now fit all the range of smaller caravans and trailer tents without the need for any extra fitting or chassis modifications. With its exceptional power and improved traction it will drive any single axle caravan or trailer (regardless of its weight) up slopes in excess of 1 in 4 (25%).</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;">  <p>MANUAL</p> </div> <div style="text-align: center;">  <p>AUTO</p> </div> </div>
---	--

<p>PowrTouch Classic M3</p> 	<p>The PowrTouch Classic caravan mover is designed to fit caravans that have shock absorbers fitted or have a narrow gap (less than 105mm) between the chassis and the tyre, but fitted with a reduction gearbox to provide more moving power to the caravan wheels than all other current traditional caravan movers. Under ideal conditions it is expected that this model will move a 1,500 Kgs (approx 1.5UK tons) caravan up a 1 in 4 slope.</p> <p>The Original PowrTouch Classic mover system is competitively priced and designed and manufactured to ISO 9001:2008 and TUV standards.</p> <p>Traditional design and construction materials.</p> <p>Powrbar cross actuation system that allows BOTH rollers to be engaged or disengaged from EITHER side of the caravan.</p> <p>Designed for maximum ground clearance.</p> <p>Fluid movement control giving the ability to change direction without stopping.</p> <p>Full soft start system giving MILLIMETRE by MILLIMETRE control.</p> <p>Full DIY instructions available.</p> <p>Low battery indication system (for both the handset and caravan battery).</p> <p>Automatic shutdown after 20 minutes to prevent accidental battery drain if the PowrTouch is left switched on.</p> <p>Instant stop the moment the handset buttons are released.</p>
---	---

<p>PowrTouch Standard (Two wheel drive)</p>	<p>This caravan mover will drive any twin axle up a minimum slope of 1 in 4; it now makes no difference whether the unit is fitted on the front wheels or behind the rear wheels because it will give the same performance. Your decision on which twin axle caravan mover to purchase is now down to your space/manoeuvrability requirements. i.e. If only gentle turns in a reasonable space are required then this mover will prove highly satisfactory.</p>
--	---

<p>PowrTouch All Wheel Drive (drives all four wheels of a twin axle caravan)</p>	<p>With the addition of a further two driving wheels this feature makes the PowrTouch Evolution 'All Wheel Drive' the ultimate caravan mover system for the highest possible manoeuvrability of a twin axle caravan: this is a MUST for those tight turns in limited space.</p>
---	---

FOR ADDITIONAL INFORMATION / FEATURES PLEASE LINK TO MANUFACTURER www.powrwheel.com

A MINIMUM OF A 85AH LEISURE BATTERY IS MIN REQUIRED (ECS recommend 110ah if space permits) and A TRICKLE CHARGER IS REQUIRED FOR ALL CARAVANS THAT DO NOT HAVE A 12V CHARGER FITTED IN THE CARAVAN . All Motormovers require a fully charged Battery
